Summary

- Passionate app developer focused on creating intuitive mobile experiences using Flutter.
- Proficient in Python, Flutter, Firebase, Django, Java, and C++.
- Committed to continuous learning, collaborative teamwork, and delivering high-performing applications.

Interests/Skills

- Flutter, Firebase, Git.
- Dart, GetX, Java, C++, Python, SQL, GUI, Django

Experience

Flutter Developer Intern | Remote Internship   *Aug 2024 – Oct 2024*

- Delivered a high-performance app with optimized code and seamless UX.
- Used Git for version control and MobX for state management.

Education

Bachelor of Computer Science   *Comsats University Islamabad, Sahiwal Campus*

- **CGPA:** 3.75
- January 2022 – February 2026

Projects

Lumina – AI-Powered Career Counselling App *(Final Year Project)*

- A cross-platform mobile app helping students with university recommendations, merit predictions, real-time admission updates, resume building, and alumni networking.

- Built using Flutter and integrated with AI models for intelligent counseling.

- Features modules for students, alumni, universities, and administrators.

AI Resume Builder App *(2025)*

- Developing a smart resume builder app using Flutter frontend and Flask backend with Gemini/OpenAI for AI-driven resume suggestions.

- Supports structured resume input, PDF generation from HTML templates, and ATS optimization.

- Includes multiple user flows: resume from scratch and AI enhancement for existing resumes.

TripMates – Travel App *(Dec 2024 – Present)*

- Built with Flutter, Firebase Firestore, GetX (MVVM), and Cloudinary.

- Enables travel booking, profile management, and in-app community messaging.

Home Nest – Furniture Marketplace *(Oct – Nov 2024)*

- E-commerce app using Firebase Realtime DB and Provider for state management.

- Includes real-time listings, user authentication, and smooth UI/UX.

Weather App *(Aug 2024)*

- Real-time weather forecasting app using external API.

- Deployed at: weatherapp-cb0bf.web.app
